SUMMARY OF ACCESSIBILITY UPGRADES FOR COMMERCIAL PROJECTS

INFORMATION BULLETIN

The provisions of Section 11B-202.4 Exception 8 apply to existing buildings or facilities used as public buildings, public accommodations, commercial buildings or public housing. When these buildings or facilities undergo alterations, structural repairs, or additions, an accessible path of travel must be provided to the specific area of construction.

When the adjusted construction cost ¹ of alterations, structural repairs, or additions to existing buildings and facilities within three years of the original does not exceed a valuation threshold of \$156,162.00 (2017) the cost of compliance with Section 11B-202.4 of the 2019 California Building Code shall be limited to 20% of the adjusted construction cost of alterations, structural repairs or additions.

In choosing which accessible elements to provide, priority should be given to those elements that will provide the greatest access in the following order:

1. An accessible entrance;
2. An accessible route to the area of alteration, structural repair, or addition (see definition of accessible route Section 202 & 11B-206.2.1 for more information on accessible routes and site arrival points);
3. At least one accessible restroom for each sex serving the area of alteration, structural repair, or addition;
4. Accessible telephones, if provided, serving the area of alteration, structural repair, or addition;
5. Accessible drinking fountains, if provided, serving the area of alteration, structural repair, or addition; and
6. When possible, additional accessible elements such as additional parking, storage, signs and alarms.

The second page of this Information Bulletin provides an example showing a Summary of Accessibility Upgrades.

¹ Adjusted cost of construction does not include the cost of alterations to path of travel elements required to be upgraded outside the area of alteration, structural repair, or addition.
