

## Street Maintenance and Rejuvenation

Next month we will be repaving and repairing some of the most heavily traveled streets in town. This will include El Camino Real, Apple, Oak, and portions of Palm, Maple, and Elm. We will also be resurfacing the streets and alleys in the newer subdivisions. This map shows the streets that will be affected. When this work begins, all vehicles will need to be removed from the affected streets and alleys. Advance notice will be hand-delivered to each residence and business that will be affected. Signs will also be posted at least 72 hours before any street will be closed for this work. To complete this work, it is absolutely necessary that all vehicles be removed from the streets where the repaving work is being completed. If vehicles are not removed, it will be necessary for them to be towed.

The type of repaving material we will be using will allow vehicles back on these streets within several hours of their repaving. This will minimize the inconvenience to the residents and businesses along these streets. With the cooperation of everyone, this project will be completed quickly and with minimal disruption. So please watch for the notices that will be delivered to your residence or business and signs that will be posted prior to the start of the work in your area. Your cooperation will be greatly appreciated.
